- The structure of an ODS License number is IMP-xxxxxxx-xxxxxxx-xxxxxxx-xxxxxxx where :
 - o the first three characters refer to the license type (IMP=IMPORT) ;
 - o the second group of characters can have a length from 4 to 8 characters ;
 - o the third group of characters refer to the type of the Import license ;
 - o the fourth group refers to the year of the issuance of license ;
 - o the last group is a generic system number.
- The License number must be declared in data element 12 03 001 000 (Reference number). Document code L100 should be declared in 12 03 002 000 (Type) ;
- The data relating to document codes Y797, Y798 and Y799 must be declared in 12 04 001 000 (Reference number)
- n..16.6 = 16 digits before the decimal point (**use a point, no comma!**) and up to 6 digits after. Also, do not add **units like KG, TON, etc.** These are implied in the name of the supporting document or additional reference. For Y798 and Y799, the measurement unit is kilograms by default

Applicable customs procedures for ODS verification : 01, 07, 40, 42, 43, 44, 45, 46, 48, 51, 53, 61, 63, 68, 71

Statuses appropriate for release of goods: Valid.

If the data provided are not validated through CERTEX, the customs declaration cannot be submitted.

Remark: In addition to the TARIC Document codes listed in the table above and subject to automated validation, there are other codes applicable to the importation of ODS which, where relevant, must also be declared in the customs declaration (see Tarbel – “Non-tariff measures (Restrictions)” – “Conditions”). Please note that the correctness of these codes may be subject to customs controls.
